OGS 10.0 **Excavation and Trenching for Oil and Gas**

Series/Catalog: Oil and Gas Safety Series

Linear Duration/min: 00:12:31
Interactivity: Level II
Origin Date: 05/09
Last Update: 05/09
Supervising SME: Trey Greene

Course Description: Upon completion of the learning event, the learner will display the ability to recognize the definition of a trench or excavation, common hazards associated with trenches and excavations, and OSHA's requirements for worker safety in and around trenches and excavations.

Relevant Standards: 29 CFR 1926.650 – 653

Complexity/Difficulty: Level I (very easy)

Target Audience: Tailored for an oil and gas industry audience with appropriate examples and imagery, this course is intended for oil and gas industry workers who, during the course of their regular duties, may be expected to work in or around a trench or excavation greater than four (4) feet in depth.

Prerequisites: None

Competency Statement

To successfully complete this course, the Learner will demonstrate the ability to:

OGS 10.2.0	Identify the OSHA regulations and definitions that apply to trenching and excavation	02:17
OGS 10.3.0	Recognize the potential hazards associated with excavation and trenching	05:06
